

ABSTRACT

DEVICE FOR FACILITATING MAINTENANCE OF A TRACKBALL

The invention relates to a device for facilitating maintenance of a trackball. The device comprises a trackball (1), a cover (2) inside which the trackball (1) is attached, the cover (2) comprising an opening (4) allowing a movable part (3) of the trackball (1) to appear in order to operate the movable part (3) from outside the cover (2), the trackball (1) comprising maintenance means. According to the invention, the device comprises means (5) for gaining access to the means of maintaining the trackball (1) from outside the cover (2).
